FRONT-END DEVELOPER (WEB APPLICATIONS)

Talented, creative & hard-working individual, having 9 years of experience in Software Development; considerable knowledge in the analysis, design, coding & re-engineering of web applications. Possessing sound understanding of the Software Development Processes in line with the industrial standard, seasoned professional with a unique blend of Technical, Functional and Qualitative skills.

- Expertise with angular js 1.x, angular 11, Svelte, ES6, ES2019, PWA, Service workers, JavaScript, Typescript, JSON, babel, HTML5, CSS3, CSS custom properties, SASS, CSS Grid layout, Flexbox, Node js, Express js, NPM, yarn, Bootstrap, Angular Material, NGRX, Webpack, Gulp, Kendo UI, PrimeNg, ag-grid, jQuery, D3 js, SVG, Jasmin, Karma, Protractor, Cypress, TSLint, Google Map API, JSDoc, CSS styled components, BEM, GraphQL, NEST JS, WebSocket, java, spring boot, JSF, maven, hibernate, JPA, Responsive Web Design, Design Patterns, Deno and ORM.
- Making existing sites faster and more resilient.
- Measuring and benchmarking perceived performance.
- Understanding the web page loading.
- Identifying server-level performance hang-ups.
- How and when file size matters most
- Evaluating patterns for loading or including CSS, JavaScript, Images, SVG, and Fonts.
- Optimizing the critical path to perceived performance.
- Helpful Tools and libraries.
- HTTP/2 and its helpful additions
- Content Delivery Networks and edge cache transformations.
- Enhancing a user interface optimistically, yet safely.
- Client-side caching strategies.
- Service Workers for spotty or offline connectivity
- Retaining performance after page load.

Technical Skills:

Programming Languages: C, C+, JAVA, J2EE, Node JS, Spring, JPA Web Technologies: HTML5, CSS3, GRID, FLEXBOX, TypeScript, Angular, Svelte and JavaScript Development Tools: Eclipse, Visual Studio, VSCODE, WebStorm, IntelliJ Tools & Techniques: MS-Office, MS-Excel, PowerPoint, Webpack and Gulp Operating System: Windows Version Controls: GIT and SVN Testing Tools: Karma, Jasmin and Protractor Performance Tools: Chrome Lighthouse, webpage test, fiddlers and Auditing

EMPLOYMENT SPAN

(Software Development) Infor Senior Software Engineer	Since Month Year 04/2017 — Now
Bank of America, Hyderabad Senior Software Engineer	04/2015 – 04/2017
Infosys, Hyderabad Software Engineer	10/2014 – 04/2015
RayBiz Technologies, Hyderabad Software Developer	02/2012 – 09/2014

- Coding and creating software applications as per the requirement from the client. Exposure in end-to-end development from
 requirement analysis to system study, designing, coding, testing and debugging.
- Involved in Software Development with all phases of software development life cycle, analysis, design, implementation, debugging.
- Fixing all the bugs reported by the testers, conducting Research and Development on issues created after testing and ensure smooth implementation of the project.
- Assisting design & development of the workflow diagrams & follow up till solving the problem along with writing database queries. Responsible for all sorts of technical documentation related to the project.
- Collaborating with the team members and senior management to maintain a continuous stream of information regarding the project status and progress. Deftly coordinating with onsite for timely delivery of project & query resolutions.

EDUCATION

MCA | Andhra University, Guntur | 2012 | 80%

ANNEXURE: Key Projects

Project Chat Application Infor Environment AngularB, JavaScript, TypeScript, jOuery, HTML5, Jasmine, Karma, Protractor, CSS, SASS, Yarn, Web Sockets, Grid, TSLint, and NPM. Description Chat App will be like Microsoft teams and slack of which all our customers can use it for their business needs for chatting, sharing, posting, replies, likes, attachments, groups and audio video calling for communication. Responsibilities Using Angular to build all reusable components Connecting WebSocket's for subscribe and unsubscribe listeners Build reusable code and libraries for future use Ensure the technical feasibility of ULVIX designs Optimize application for maximum speed and sclability Assure that all userinput is validated before submitting to backend Collaborate with other team members Debug issues and fix it before the deadline for all UAT and PROD issues Fundamental understranding of Performance Optimization Update to date with JS and JS dev community Yara, Web Sockets, NPM and NGXX. Description Infor Description Infor Vara, Web Sockets, NPM and NGXX. Vara, Web Sockets, SPM and NGXX. Vara, Web Sockets, NPM and NGXX. Vara, Web Sockets, NPM and NGXX. Did appt omaintain and keep track of all the assets like trucks, buses, cars, engine health _check, elevators
